[...] help GraphQL become a reliable industry standard

# GraphQL

*June 2018 Edition*

## Introduction

This is the specification for GraphQL, a query language and execution engine originally created at Facebook in 2012 for describing the capabilities and requirements of data models for client-server applications. The development of this open standard started in 2015.

GraphQL has evolved and may continue to evolve in future editions of this specification. Previous editions of the GraphQL specification can be found at [permalinks that match their release tag](#). The latest working draft release can be found at [facebook.github.io/graphql/draft/](https://facebook.github.io/graphql/draft/).

## Copyright notice

As of September 26, 2017, the following persons or entities have made this Specification available under the Open Web Foundation Final Specification Agreement (OWFa 1.0), which is available at [openwebfoundation.org](https://openwebfoundation.org).

- Facebook, Inc.

You can review the signed copies of the Open Web Foundation Final Specification Agreement Version 1.0 for this specification at [github.com/facebook/graphql](https://github.com/facebook/graphql), which may also include additional parties to those listed above.

Your use of this Specification may be subject to other third party rights. THIS SPECIFICATION IS PROVIDED “AS IS.” The contributors expressly disclaim any warranties (express, implied, or

## GraphQL

- 1 Overview
- ▶ 2 Language
- ▶ 3 Type System
- ▶ 4 Introspection
- ▶ 5 Validation
- ▶ 6 Execution
- ▶ 7 Response
- ▶ A Appendix: Notation Conventions
- ▶ B Appendix: Grammar Summary
- § Index

I think GraphQL wins my heart because **it changes human behavior.**

Garrett Heinlen: <https://www.youtube.com/watch?v=e6ziHGPkaKM>

**WHY**

We needed a data-fetching API **powerful** enough to describe all of Facebook, yet simple enough to be **easy to learn and use** by our product developers.

## FIELDS

avatarUrl(size: Int): URI!

A URL pointing to the user's public avatar.

bio: String

The user's public profile bio.

bioHTML: HTML!

The user's public profile bio as HTML.

commitComments(

after: String

before: String

first: Int

last: Int

): CommitCommentConnection!

A list of commit comments made by this user.

**HOW**

```
query {  
  user(id: "abc") {  
    id  
    name  
  }  
}
```

```
type Query {  
  user(id: ID!): User  
}
```

```
type User {  
  id: ID!  
  name: String  
}
```

```
const schema = new GraphQLSchema({
  query: new GraphQLObjectType({
    name: 'Query',
    fields: {
      user: {
        type: UserType,
        args: {
          id: { type: GraphQLID }
        },
        resolve: (root, args, context, info) => {
          const { id } = args
          return fetchUserById(id)
        }
      }
    }
  })
})
```

```
const UserType = new GraphQLObjectType({
  name: 'User',
  fields: {
    id: {
      type: GraphQLID,
      resolve: (root, args, context, info) => {
        return root.id
      }
    },
    name: {
      type: GraphQLString,
      resolve: (root, args, context, info) => {
        return root.name
      }
    }
  }
})
